

CDP Global Climate Forum on 12th September

Main theme for the Forum is “Driving economic growth without increasing carbon emissions”. On September 12, CDP will host its 2013 Global Climate Forum. Leading corporate, government and investor decision makers will debate solutions to achieve large scale economic growth without increasing carbon emissions. The Forum will bring inspirational speakers together from across the globe via Cisco TelePresence for a workshop-style event to be broadcast live online. These experts will propose solutions for emerging and established economies, sectors and industries. Ideally placed just two months ahead of the UN Framework Convention on Climate Change (COP19), the Forum will also create a ‘call to action’ for international leaders.

Take action, join us and be part of the debate this year by using #CDPforum in advance of the event and on the day, when we will feed questions through to the panel.
